Precertification is the determination that selected inpatient and outpatient medical services, including surgeries, major diagnostic procedures and referrals meet criteria for medical necessity under the member's benefits contract. For the member to receive maximum benefits, Anthem must authorize these covered services prior to being rendered. Precertification helps avoid unnecessary charges or penalties by ensuring that the member's care is administered at a network facility and by a network provider.

- Precertification includes a review of both the service and the setting.
- Care will be covered according to the members benefits for the number of days precertified unless our concurrent review determines that additional days qualify for coverage.
- Certain services may require the member to use a provider designated by their health benefit plan.

**Precertification Responsibility**

Network physicians are required to obtain precertification for patients with HMO, POS, PPO, and EPO coverage. If a member visits an out-of-network physician, precertification is their responsibility. Regardless of whether a member visits a doctor in the network, or out-of-network, it is always a good idea to check with their physician if the services have been precertified.

The Precertification number is listed on the back of the member's Anthem ID card.

Services listed are effective and current January 1, 2017 unless specified. For benefits to be paid, the member must be eligible on the date of service and the service must be a covered benefit under the policy. This list is subject to change.
