Social Work and Psychological Services in CORFs

CMS released an educational article and corresponding Change Request (8257) which provides the list of HCPCS codes billable in Comprehensive Outpatient Rehabilitation Facilities (CORFs). It also manualized the billing instructions for a National Coverage Determination related to CORFs that was previously omitted from the Medicare Claims Processing Manual.

Important to note from the article is the direction of billing for G0409 (billing of social work and psychological services in the CORF setting), as it can only be billed with revenue codes 0569 or 0911 on a 75X Type of Bill.

To view the information and billing requirements please visit the following CMS Article.
